PROFESSIONAL SUMMARY

Results-driven computer science developer with experience in software and cloud development. Experienced in designing and deploying scalable web applications using Next.js, Node.js, React, and AWS, with a focus on delivering efficient, secure, and user-friendly solutions.

PROJECTS

- | | |
|--|------|
| Smart Hospital System | 2023 |
| <ul style="list-style-type: none">– Led a team of 5 to create an RFID-based hospital appointment management platform.– Designed and implemented authentication with role-based access control, reducing data access errors by 60%.– Achieved 100% functionality with a secure modular 3-tier architecture. | |
| Electro Buck – IoT Electricity Monitor <i>Arduino, Next.js, Firebase</i> | 2024 |
| <ul style="list-style-type: none">– Built an end-to-end IoT system to monitor real-time power usage across appliances.– Displayed live energy data using a Firebase backend and responsive React-based UI.– Achieved 90%+ measurement accuracy through sensor calibration and test benchmarking. | |
| Automated Cloud Misconfiguration Scanner <i>AWS, Python, Power BI</i> | 2025 |
| <ul style="list-style-type: none">– Collaborated in a team of 3 to develop an automated AWS tool integrated with Power BI for detecting and visualizing cloud misconfigurations.– Responsible for maintaining and managing cloud configurations, ensuring compliance, and optimizing system reliability. | |

EXPERIENCE

- | | |
|--|--|
| Technical Team Member | Be a Nerd Club, VIT-AP |
| | 2023 |
| <ul style="list-style-type: none">– Supported the technical team in creating automation scripts and dashboards for internal projects.– Assisted in developing web tools for 100+ participants during awareness programs.– Improved testing efficiency by 30% through documentation and process automation. | |
| Team Lead – Smart Hospital System | Smart India Hackathon, VIT-AP |
| | 2023 |
| <ul style="list-style-type: none">– Led a team of 5 to build a secure RFID-based appointment system used in mock simulations for 50+ patients.– Developed a real-time web app using Next.js, Node.js, and MongoDB with 3-tier architecture.– Implemented role-based access control (RBAC) and authentication for improved data privacy. | |
| Frontend Developer | Engineering Clinics, VIT-AP University |
| | 2023 |
| <ul style="list-style-type: none">– Developed an IoT-based electricity tracker used in demo labs to monitor 10+ appliances' power usage.– Built a real-time dashboard with React and integrated Firebase, achieving 1-second sync latency.– Completed MVP delivery 2 weeks ahead of schedule while maintaining 100% functionality coverage. | |

EDUCATION

- | | |
|--|--------------------------|
| VIT-AP University | Amravati, Andhra Pradesh |
| <i>B.Tech. in Computer Science with Business Systems</i> | 2022 – 2026 |
| Global Public School | Kota, Rajasthan |
| <i>12th Grade – 86%</i> | 2022 |
| Global Public School | Kota, Rajasthan |
| <i>10th Grade – 84%</i> | 2020 |

TECHNICAL SKILLS

Programming: C/C++, Python, JavaScript, SQL, HTML/CSS

Frameworks: React, Next.js, Node.js, Flask

Cloud and Databases: AWS (EC2, S3, Lambda, CloudWatch), MongoDB Atlas, Firebase

Tools: Git, VS Code, Docker, Power BI

Libraries: Pandas, NumPy, Selenium, Matplotlib

Certifications: Cisco Networking Essentials, Oracle Professional Networking
