PROFESSIONAL SUMMARY

Cloud and systems-focused developer with proficiency in C/C++ and knowledge of operating systems and computer networks. Experienced in building and managing cloud-based applications using platforms like Azure and AWS, with exposure to backend and full-stack development using Node.js and React. Interested in developing efficient and secure systems, with a focus on cloud infrastructure and low-level programming.

PROJECTS

- Automated Cloud Misconfiguration Scanner** | *Azure, Python* 2026
- Designed an event-driven cloud security system to detect misconfigurations using Azure Activity Logs and Log Analytics.
 - Built a real-time log processing pipeline to filter and analyze cloud activity data for security issues.
 - Implemented serverless auto-mitigation using Azure Functions to automatically enforce security policies.
- Electro Buck – IoT Electricity Monitor** | *Arduino, Next.js, Firebase* 2024
- Built an end-to-end IoT system to monitor real-time power usage across appliances.
 - Displayed live energy data using a Firebase backend and responsive React-based UI.
 - Achieved 90%+ measurement accuracy through sensor calibration and test benchmarking.
- Smart Hospital System** | *Next.js, MongoDB Atlas* 2023
- Led a team of 5 to create an RFID-based hospital appointment management platform.
 - Designed and implemented authentication with role-based access control, reducing data access errors by 60%.
 - Achieved 100% functionality with a secure modular 3-tier architecture.

EXPERIENCE

- Team Lead – Smart Hospital System** Smart India Hackathon, VIT-AP 2023
- Led a team of 5 to build a secure RFID-based appointment system used in mock simulations for 50+ patients.
 - Developed a real-time web app using **Next.js**, **Node.js**, and **MongoDB** with 3-tier architecture.
 - Implemented role-based access control (RBAC) and authentication for improved data privacy.
- Technical Team Member** Be a Nerd Club, VIT-AP 2025
- Supported the technical team in creating automation scripts and dashboards for internal projects.
 - Assisted in developing web tools for 100+ participants during awareness programs.
 - Improved testing efficiency by 30% through documentation and process automation.
- Frontend Developer** Engineering Clinics, VIT-AP University 2024
- Developed an IoT-based electricity tracker used in demo labs to monitor 10+ appliances' power usage.
 - Built a real-time dashboard with **React** and integrated **Firebase**, achieving 1-second sync latency.
 - Completed MVP delivery 2 weeks ahead of schedule while maintaining 100% functionality coverage.

EDUCATION

- VIT-AP University** Amravati, Andhra Pradesh 2022 – 2026
B.Tech. in Computer Science with Business Systems
- Global Public School** Kota, Rajasthan 2022
12th Grade – 86%
- Global Public School** Kota, Rajasthan 2020
10th Grade – 84%

TECHNICAL SKILLS

Programming: C/C++, Python, JavaScript, SQL, HTML/CSS

Frameworks: Next.js, Node.js, Flask

Cloud and Databases: Azure, AWS, MongoDB Atlas, Firebase

Tools: Git, VS Code, Docker, Power BI

Libraries: Pandas, NumPy, Matplotlib

Certifications: Cisco Networking Essentials, Oracle Professional Networking
